- (iv) must operate within the appropriate limits of error for that type of weighbridge that may be tolerated under the *Trade Measurement Act 1993*; and

(b) in order to determine the mass of a vehicle with or without its load and the mass carried on any two or more axles of a vehicle on a weighbridge, it is not necessary to measure the mass carried on all the relevant axles simultaneously, but the mass may be determined by aggregating the measurements of mass taken separately in relation to the axles in question, provided that in determining the mass carried on a vehicle having an axle group or axle groups, the axles within each group must be measured as a whole; and

(c) when an approved instrument for determining mass is used in order to determine the mass of a vehicle with or without its load and the mass carried on any two or more axles of a vehicle, the mass may be determined by aggregating the measurements of mass taken simultaneously or separately in relation to the axles in question, provided that, in determining the mass carried on individual axles of an axle group, all of the axles within that group must be measured simultaneously and must, as far as possible in the circumstances, be in the same plane.

Road Traffic (Miscellaneous) Regulations 1999

SCHEDULE 1

Prescribed oral advice and written notice (Section 47G(2a)(a))

ROAD TRAFFIC ACT 1961

PART A

ORAL ADVICE FOR THE PURPOSES OF SECTION 47G(2a)(a)

The breathalyser reading just taken shows that you had a prohibited level of alcohol in your blood.

Therefore, it appears that you have committed an offence against section 47B of the *Road Traffic Act*.

In any court proceedings for that offence, or for an offence against section 47 of the *Road Traffic Act* (driving under the influence of liquor), it will be presumed that the breathalyser accurately indicated your blood alcohol level at the time of the reading and for the preceding two hours. However, the *Road Traffic Act* allows for contrary evidence based on the results of a blood test.

If you want to have such a blood test you will have to make your own arrangements and follow certain procedures, using a special blood test kit. This blood test kit will be supplied to you on your signing a written request.

If you obtain a blood test kit and want to have your blood tested, you should take the kit promptly to a hospital or medical practitioner in order to have a sample of your blood taken.

[*Alternatively, you may have the sample taken by a registered nurse.]

You must not consume any more alcohol before having a sample of your blood taken and must not open the blood test kit before delivering it to a medical practitioner [*or registered nurse].

Under the blood test procedure, the sample of blood is divided and sealed in two containers. You will have to sign a form that will be given to you by the medical practitioner [*or registered nurse].

One of the sealed containers will be given to you and you may make your own arrangements to have the blood in that container analysed.

In any event, the blood in the other container will be analysed by State Forensic Science and you will be given written notice of the results of the analysis.

Further information as to these matters is contained in the written notice which will be delivered to you shortly.

* Advice as to the alternative of a registered nurse is to be given only if the breath analysis was conducted outside Metropolitan Adelaide.

PART B

WRITTEN NOTICE FOR THE PURPOSES OF SECTION 47G(2a)(a) OF ROAD TRAFFIC ACT 1961

OPERATION OF ROAD TRAFFIC ACT IN RELATION TO RESULTS OF BREATH ANALYSIS

1. Offence

A person commits an offence against section 47B(1) of the *Road Traffic Act 1961* if the person—

- (a) drives a motor vehicle: or
- (b) attempts to put a motor vehicle in motion,

while there is present in his or her blood the prescribed concentration of alcohol (as defined in section 47A of the Act).

2. Breath analysis

Your breath has just been analysed by means of a breath analysing instrument which indicated that the prescribed concentration of alcohol was present in your blood.

Accordingly, it appears that you have committed the offence described above.

3. Legal effect of breath analysis result

In proceedings for the offence described above or an offence against section 47(1) of the *Road Traffic Act 1961* (driving under the influence of liquor), the result of the breath analysis will be presumed to accurately record the concentration of alcohol in your blood at the time of the analysis and throughout the preceding 2 hours (*section 47G(1),(1ab)*).

In any proceedings against you for such an offence, you will be able to challenge the accuracy of the breath analysis reading—

- if you have a sample of your blood taken and analysed *as described below*

AND

- if the result of analysis of the blood sample shows that the breath analysing instrument gave an exaggerated reading of the concentration of alcohol present in your blood (*section 47G(1a)*).

PROCEDURES FOR OPTIONAL BLOOD TEST

1. You may have a sample of your blood taken and analysed if you wish.
2. For that purpose, you must request the breath analysis operator to supply you with an approved blood test kit (you must sign a written request form for the kit and should retain a copy of the signed request form).
3. You should then proceed promptly to a hospital or a medical practitioner [*or registered nurse] of your choice and request that a sample of your blood be taken (using the blood test kit).
4. Do not consume any further alcohol before the sample is taken.
5. Do not open the blood test kit.
6. The medical practitioner [*or registered nurse] taking the sample of your blood will divide it and place it into two containers and seal the containers. One container will be delivered to you — do not break the seal on this container.
7. Sign the form presented to you by the medical practitioner [*or registered nurse] — the original of the form will be given to you which you should retain.
8. You may, if you wish, have the blood sample (in the container delivered to you) analysed at a laboratory to determine the concentration of alcohol present in the blood.
9. The other blood sample container will, in any event, be sent to State Forensic Science where the blood will be analysed. The results of this analysis will be sent to you at your address (as indicated on the form presented to you by the medical practitioner [*or registered nurse] who took the blood sample).

* The alternative of a registered nurse applies only if the breath analysis was conducted outside Metropolitan Adelaide.
