48A—Applications for licences

- (1) An application for a sewage mining licence—
 - (a) must be made to the Corporation in a manner and form approved by the Minister; and
 - (b) must be accompanied by a fee prescribed by the regulations.

48B—Area to which licence must relate etc

- (1) An application must relate to a specified part of the undertaking.
- (2) The area to which an application relates must not exceed a maximum permissible area prescribed by the regulations (but this subsection does not prevent a person holding separate sewage mining licences relating to 2 or more areas, including contiguous areas).
- (3) An application must not relate to any part of the undertaking that is already covered by a sewage mining licence.

48C—Grant of licences

- (1) The Corporation may grant a sewage mining licence on application under this Part if satisfied—
 - (a) that the applicant satisfies any prescribed qualifications; and
 - (b) that the applicant will be able to comply with any relevant requirement imposed by or under this Part, or with any conditions imposed with respect to the licence.
- (2) The Corporation may also, in considering whether to grant an application, take into account such other factors as the Corporation thinks fit.

48D—Location of licence

- 5
- (1) A sewage mining licence will apply with respect to a part of the undertaking specified by the Corporation in the licence.
 - (2) If the Corporation proposes to specify a part of the undertaking that is different to the part to which the application related, the Corporation must, before finalising its decision, allow the applicant a reasonable opportunity to make submissions in relation to the matter.

48E—Conditions

- 10
- (1) A sewage mining licence will be subject to—
 - (a) any conditions prescribed by the regulations; and
 - (b) any conditions imposed by the Corporation with respect to the licence.

 - (b) the method of extraction, and the use of any fittings or equipment for the purposes of making or undertaking any extraction;
 - (c) the quantity of waste material that may be extracted over any specified period, or the rate of extraction over any specified period or at any specified time;
 - (d) the management, treatment or use of any waste material that is extracted;
 - (e) the procedures and processes to be followed to protect public health and safety, and to ensure that the undertaking is not damaged or adversely affected.
 - (3) The Corporation may, if it considers it appropriate to do so, (and whether on application or on its own initiative) by notice in writing to the holder of the licence, vary a condition to which the licence is subject.
 - (4) The conditions of a licence may be varied by the addition, substitution or deletion of 1 or more conditions.
