- (2) For the purposes of subsection (1), a person is presumed to have decision making capacity unless there is evidence to the contrary.
- (3) For the purposes of subsection (1)(a), a person is taken to understand information relevant to a decision if the person understands an explanation of the information given to the person in a way that is appropriate to the person's circumstances, whether by using modified language, visual aids or any other means.
- (4) In determining whether or not a person has decision making capacity, regard must be had to the following:
 - (a) a person may have decision making capacity to make some decisions and not others;
 - (b) if a person does not have decision making capacity to make a particular decision, it may be temporary and not permanent;
 - (c) it should not be assumed that a person does not have decision making capacity to make a decision—
 - (i) on the basis of the person's appearance; or
 - (ii) because the person makes a decision that is, in the opinion of others, unwise;
 - (d) a person has decision making capacity to make a decision if it is possible for the person to make a decision with practicable and appropriate support.

6—Voluntary assisted dying not suicide

- (1) For the purposes of the laws of the State, the death of a person by the administration of a voluntary assisted dying substance in accordance with this Act will be taken not to constitute the death by suicide of the person.
- (2) Without limiting subsection (1), for the purposes of the laws of the State, and any professional standard or code of conduct (however described), a person who performs an act or omission in relation to the voluntary assisted dying of a person in accordance with this Act will be taken not, by that act or omission alone, to have aided, abetted, counselled or procured the suicide of the other person.
