4A—Electronic drug detection

- (1) For the purposes of paragraph (b) of the definition of *general drug detection* in section 4(1) of the Act, an electronic drug detection system may only be used in a manner consistent with this regulation.
- (2) An electronic drug detection system may only be used in relation to a person in accordance with the following:
 - (a) by taking samples of particulate matter from—
 - (i) the outside of the person's clothing; and
 - (ii) the person's hands,for the purpose of analysis to detect the presence of a controlled drug, controlled precursor or controlled plant;
 - (b) the person cannot be required to remove, undo or rearrange any clothing for the purpose of taking such samples from the person's clothing;
 - (c) in taking such samples from the person's clothing, care must be taken to avoid disturbing the person's clothing.
- (3) An electronic drug detection system may only be used in relation to property (other than a vehicle) by taking samples of particulate matter from the outside of the property for the purpose of analysis to detect the presence of a controlled drug, controlled precursor or controlled plant.
- (4) An electronic drug detection system may only be used in relation to a vehicle in accordance with the following:
 - (a) by taking samples of particulate matter from both the exterior and interior of the vehicle (but not from the inside of any internal storage compartment) for the purpose of analysis to detect the presence of a controlled drug, controlled precursor or controlled plant;
 - (b) articles must not be removed from the vehicle for the purpose of taking such samples.
- (5) For the purposes of this regulation, samples of particulate matter may be taken by swabbing, wiping or otherwise touching a surface to obtain a sample of particles from that surface.

(6) In this regulation—

internal storage compartment, in relation to a vehicle, means a glove box, drawer, cupboard, pocket or other similar compartment within the vehicle that is designed by the manufacturer—
