#### 6—Interpretation

In this Division, a reference to a *person who is in control of a vessel* includes a reference to a swimmer who is using a submersible or other vessel.

#### 7—Application of Division

This Division only applies in relation to a vessel if the observing of marine mammals or swimming near marine mammals is the purpose, or 1 of the purposes, for which the vessel is being used.

#### 8—Distance to be kept by prescribed vessels

A person who is in control of a prescribed vessel must not move the vessel closer than 300 metres to a marine mammal.

#### 9—Distance to be kept by other vessels

- (1) A person who is in control of a vessel that is not a prescribed vessel must not—
  - (a) move the vessel closer than 100 metres to a whale; or
  - (b) move the vessel closer than 50 metres to a marine mammal other than a whale.
- (2) A person who is in control of a vessel that is not a prescribed vessel must not move the vessel closer than 300 metres to a whale if—
  - (a) the whale—
    - (i) shows signs of disturbance; or

- (ii) appears to be sick or injured; or
    - (iii) is stranded; or
    - (iv) is entangled or otherwise incapacitated by material of human origin; or
    - (v) is a calf; or
    - (vi) is within a protection area; or
  - (b) there are 2 vessels already within 300 metres of the whale.
- (3) A person who is in control of a vessel that is not a prescribed vessel must not move the vessel closer than 150 metres to a marine mammal other than a whale if—
- (a) the marine mammal—
    - (i) shows signs of disturbance; or
    - (ii) appears to be sick or injured; or
    - (iii) is stranded; or
    - (iv) is entangled or otherwise incapacitated by material of human origin; or
    - (v) is a calf or pup; or
  - (b) there are 2 vessels already within 150 metres of the marine mammal.

**Examples—**

The following are examples of a dolphin or whale showing signs of disturbance:

- attempts to leave an area;
- attempts to leave waters in the vicinity of a vessel;
- hasty diving;
- changes in breathing patterns;
- increased time diving as compared with time spent at the surface of waters;
- changes in acoustic behaviour;
- the onset of aggressive behaviour such as tail slashing or trumpet blowing.

The following are examples of a seal or sea lion showing signs of disturbance:

  - (c) allow the vessel to remain within 150 metres of the marine mammal for more than 60 minutes.
- (3) If a whale moves towards a vessel that is within 300 metres of the whale, the person who is in control of the vessel must not use, or continue using, the vessel—
- (a) to enable the observation of the whale; or
  - (b) for the purposes of swimming, or enabling persons to swim, near the whale,
- unless the person either maintains the vessel's position or moves it away from the whale.
- (4) If a marine mammal other than a whale moves towards a vessel that is within 150 metres of the marine mammal, the person who is in control of the vessel must not use, or continue using, the vessel—
- (a) to enable the observation of the marine mammal; or
  - (b) for the purposes of swimming, or enabling persons to swim, near the marine mammal,

- (8) If a whale shows signs of disturbance by the presence of a vessel that is within 300 metres of the whale, the person in control of the vessel must move the vessel to at least 300 metres from the whale and keep the vessel at that distance until the whale no longer shows signs of disturbance.
- (9) If a marine mammal other than a whale shows signs of disturbance by the presence of a vessel that is within 150 metres of the marine mammal, the person in control of the vessel must move the vessel to at least 150 metres from the marine mammal and keep the vessel at that distance until the marine mammal no longer shows signs of disturbance.

  - (a) at an altitude of less than 300 metres above a marine mammal; or
  - (b) at an altitude of less than 300 metres above any part of a circular area that has a marine mammal at its centre and a radius of 300 metres.
- (4) If a marine mammal shows signs of disturbance by the presence of an aircraft, the person in control of the aircraft must not use, or continue using, it to enable the observation of the marine mammal unless the person flies the aircraft away from the marine mammal until the marine mammal no longer shows signs of disturbance.

## Division 3—People
